

SUPER EASY, SUPER FAST, SUPER TOUGH. MEYER SUPER-V2

Meyer's second generation V-plow, features a 70 degree attack angle and a blade that tapers from 38" to 30.5" to provide excellent snow rolling and throwing action similar to that of a highway plow. Meyer's exclusive one-button controller lets you put the plow in just about any configuration by pushing just one button. The dual acting cylinders lock the blade position, so you can back drag snow in any blade position; and each of the bottom-trip moldboards trip independently. Available in 8.5' and 9.5' lengths, the versatile Super V2 features double acting cylinders and a pistol grip controller with one-button functionality for straight or v-blade configurations. Super V2's bottom trip design holds most of the load is an obstruction trips the plow, reducing the number of passes required to finish a job.
